
John Smith — Senior Software Engineer

SUMMARY

Results-driven Software Engineer with 5+ years of experience designing, developing, and maintaining scalable software applications using Python, Java, and SQL. Proficient in cloud infrastructure management (AWS, Azure, GCP) and DevOps practices including CI/CD pipelines, Docker, and Kubernetes. Strong background in Agile methodologies, REST APIs, and system performance optimization.

TECHNICAL SKILLS

- Languages: Python, Java, JavaScript, SQL
- Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Jenkins, Git
- Databases: PostgreSQL, MySQL, MongoDB
- Practices: Agile, DevOps, CI/CD, Code Review, REST APIs, Microservices

PROFESSIONAL EXPERIENCE

Software Engineer — TechCorp Solutions (2020–Present)

- Designed and developed scalable software applications using Python and Java, reducing system latency by 30%
- Deployed and managed cloud infrastructure on AWS using Docker and Kubernetes, ensuring 99.9% uptime
- Implemented CI/CD pipelines with Jenkins and Git, improving deployment speed by 40%
- Performed code reviews, debugging, and performance optimization across 3 product teams
- Collaborated cross-functionally using Agile methodologies and sprint planning

Junior Developer — Innovate IT (2018–2020)

- Built REST APIs and backend services using Python and SQL (PostgreSQL, MySQL)
- Supported cloud migration projects to AWS and Azure environments
- Contributed to DevOps initiatives including containerization with Docker

EDUCATION

B.Tech in Computer Science — XYZ University (2018)

CERTIFICATIONS

- AWS Certified Solutions Architect
- Docker Certified Associate
